

# Multiple Intelligences

**M**I Lessons are too hard. Do you really have time to design your lessons to engage all the intelligences? There is a solution! You can engage and develop the range of intelligences and deliver your content in developmentally appropriate ways through MI Structures! Come learn simple structures you can use as part of any lesson. You will reach more students, and you will stretch all students' many ways to be smart! Create a classroom

that respects each student's unique pattern of intelligences and level of development. In this course, you will discover your own unique pattern of intelligence, learn authentic MI assessment, and explore simple structures

to reach students the way they best learn. You will see your students through a new set of lenses, and engage them more fully than you thought possible. Come explore Kagan's MI approach!

## Participants Learn...

### Learn Structures for MI

- Take home cutting-edge, practical Structures for MI to promote success in your classroom
- Receive step-by-step instructions for each structure
- Make all your lessons come alive for all learners with classroom-proven structures for MI
- Use powerful MI structures like Kinesthetic Symbols, Team Chants, Visualize Share, Visual/Spatial Mind Mapping, and many more

### Create an MI Classroom

- Learn how your students are smart in eight ways
- Use MI to better reach and teach all your students
- Recognize your own pattern of intelligences
- Stretch your teaching to stretch students' minds
- Engage your students' smarts through MI centers, decorations, field trips, lessons, theme units, and the world-famous Kagan Structures
- Make learning more fun for everyone

### Supercharge Learning

- Make your curriculum accessible to all your students with all patterns of intelligences
- Use MI lessons and activities to make your content more engaging and exciting
- Boost learning by reaching students through their natural strengths
- Release your students' hidden potential
- Learn structures to help your students become smarter in many ways

### Become an MI Expert

- Explore MI theory and practice in-depth
- Discover a new, energizing way to look at yourself and your students
- Participate in fun activities to use with your students
- Experience hands-on activities
- Learn to ask not how smart your students are, but rather how they're smart
- Engage all learners with all intelligences

### Plan & Assess for Success

- Save planning time with easy-to-use structures
- Create "unforgettable" MI lessons
- Use fun and easy activities to engage your students' multiple intelligences and skyrocket learning
- Spice up your existing lessons with MI
- Avoid common MI testing pitfalls
- Create meaningful, authentic MI assessment

### Improve Your Classroom Climate

- Use MI to create a caring environment where students are appreciated for their uniqueness
- Boost students' self-esteem and learning
- Improve student relations with MI
- Prepare your students with diversity skills
- Give all your students the opportunity to show how smart they really are
- Successfully manage your MI classroom

## Available Formats

- 1 or 2-day workshop
- Week-long institute
- Week-long graduate course

"I have read a great deal about Multiple Intelligences, however, this workshop provided concrete, versatile structures that made my prior knowledge practical for classroom application."
